Media statement

“We continue to have wards closed due to norovirus. Norovirus is still prevalent in the wider community and we are taking necessary precautions to prevent the spread of infection. We continue to urge members of the public to stay away from the hospital unless their visit is absolutely necessary. We would like to thank everyone who has deferred their visit during this period of restricted visiting. The sooner the virus is contained, the sooner we can re-open wards and reinstate full visiting.”
