Do You Need Roche Blood Gas Analyser Training?

Roche Blood Gas Analyser Training/Password Access
A blood gas training session must be attended and a competency completed and signed in order to obtain password access to the Roche blood gas analysers. Only trained staff are authorised to use the blood gas analysers.

Individual Training

- ❖ Arrange training with your local link trainer, your ward manager will know who this is.
- ❖ Attend a Wednesday session at 2pm (locations on schedule near blood gas analyser).
- ❖ Recertification – complete a competency form to be signed off by a competent user.

If unable to obtain training via a link trainer contact POCT

Induction/Group Training

- Provided by the POCT team.
- Usually organised by departmental managers/training officers.
- If you wish this to be organised for your department please contact POCT.

Point of Care Testing (POCT) Information
All blood gas analyser documentation including competency form (Roche User training) can be found on the intranet page:

https://www.ruh.nhs.uk/pathology/poct/sops.asp?menu_id=3
OR
By scanning this code

Then scrolling down to the Omni-S and Cobas b221 section for all blood gas analyser documentation.

POCT Contact details:
