## Locate Patient if not in ED

### 1 Locate Patient if not in ED

- Step 1.** Log in to PMO  PMOOffice
- Step 2.** Click on the "Run Patient Locator" icon  in the menu at the top of the screen.
- Step 3.** The Patient Mgmt Patient Locator window opens.
- Step 4.** Type the patient's Surname in the Name field (or surname, first name to narrow the search).
- Step 5.** Click on the Search icon 
- Step 6.** The details for the patient appear in the lower pane
- Result:** The details are available which can be provided to the person placing the enquiry.

**Note:** To clear the current search and start again you can use the clear icon  which is situated next to the search icon.

## Undo Discharge

### 2 Undo Discharge

- Step 1.** Log in to PMO  PMOOffice
- Step 2.** Click conversation
- Step 3.** Double click to select the **Undo Discharge** Conversation 
- Step 4.** Search for and select the correct patient.
- Step 5.** Select the appropriate Emergency Department encounter in the lower pane.
- Step 6.** Click the **OK**  button.
- Step 7.** The **Undo Discharge** screen opens.
- Step 8.** Select the appropriate option "Administrative Error" in the **Reason for Correction** dropdown.
- Step 9.** Click the **OK**  button.
- Step 10.** To check that the patient is back in A&E – Select the **Worklist**  Conversation on the left of the screen.
- Step 11.** Double click to select **Patient On Ward**  Patients on Ward within the Worklist.
- Step 12.** Scroll down and select **RUH** from the list of Nurse Units.
- Step 13.** Select **All Wards** from the options available.
- Step 14.** Select **A&E** from the list of Wards.
- Step 15.** Click the **OK**  button.
- Step 16.** The screen displays with patient back on **A&E**.
- Result:** The Discharge has been undone for the patient.
