

Introduction to eObs

eObs is the electronic recording of observations which automatically sends the patient's observations, including NEWS, to the patient's record.

Every member of staff taking patient's observations will require their own eObs card.

If you are new to the Trust and require a new card you will need to complete the training and assessment relevant to your role, this can be found under Millennium eLearning.

If you require a replacement eObs card because yours has been damaged or lost, just send us an email to ruh-tr.digitalnurseteam@nhs.net with the following information:

1. your full name
2. smartcard number
3. ward

Remember – you must NEVER loan anyone your eObs card as this is a breach of IG.

If you have forgotten your eObs card all wards have loan cards that you will be able to sign out/in each shift, however if you do not have a card or have lost your card please follow the guidance above.
