

Payments will be taken at the time of booking and can be made using your debit or credit card.

Appointments are available:

- 4-8pm Tuesdays to Thursdays
- 9-5pm on Saturdays
(subject to availability)

We also welcome partners/friends to attend the sessions, but with a maximum of four in the room including mum.

All of our additional services are provided at the RUH with access to pay and display parking.

All scanning packages with the exception of the 4D baby scan include three thermal images for you to take home. You can also purchase these additional items:

- **DVD with images of your baby - £10**
- **Additional set of black & white glossy paper prints - £5 each or 3 for £12**

Please speak to the sonographer at the time of your appointment.

BABYVISION

PRIVATE MATERNITY SERVICES

Additional private maternity services for various stages of your pregnancy.

BABYVISION

PRIVATE MATERNITY SERVICES

Our NHS maternity services will provide you with the care you require during your pregnancy, birth and postnatally with your new baby.

We pride ourselves on listening to our families and in response to your feedback we now offer additional private services if you feel this is the right decision for you.

Here at the RUH, we offer a range of additional private maternity scans for various stages of your pregnancy.

These private scans are optional and additional to the routine NHS 12 and 20 week ultrasound scans that are important for checking your baby's anatomy in detail and are free to all expectant mums.

If you choose to have an additional private scan, you can be assured that this will be completed by a highly qualified and experienced Sonographer using the latest scanning technology.

We have the following private scans on offer:

BabyVision: Early Pregnancy Reassurance Scan

Early pregnancy can be a worrying time so between 7 and 12 weeks we offer the option of a reassurance scan to reduce any anxieties you may have.

Duration: 15 minutes. Cost: £60

IONA® Test

The IONA® test is a non-invasive prenatal test (NIPT) for women who are at least 10 weeks pregnant. This test estimates the risk of a baby, for example, having Down's syndrome or another chromosomal disease. This test also includes a reassurance scan during the appointment.

Duration: 20 minutes. Cost: £500 or £525 with the scan

BabyVision: Gender Scan

If you would like to find out if you are having a boy or girl before your 20 week scan, we can confidently assure you of your baby's gender with 97% accuracy. This scan can be booked between 16 and 20 weeks pregnant.

Duration: 15 minutes. Cost: £60

BabyVision: Assurance (well-being) Scan

We know it can feel like a long time between having your 20 week scan and when you meet your baby. We offer you the choice of a scan during this time that will check your baby's growth and heartbeat. You will also be provided with a well-being report to take home with you.

Duration: 15 minutes. Cost: £60

BabyVision: 4D Baby Scan

Between 24-34 weeks a 4D scan is a new and exciting way to meet your baby before birth. You may even see your baby move, yawn, smile or even sucking his or her thumb in live motion.

Duration: 45 minutes. Cost: from £100

For more information about any of these services please visit: www.ruh.nhs.uk
